

🚀 Week 3 Progress Update | Frontend Web Development Internship

🏢 IT-Simplera Solutions

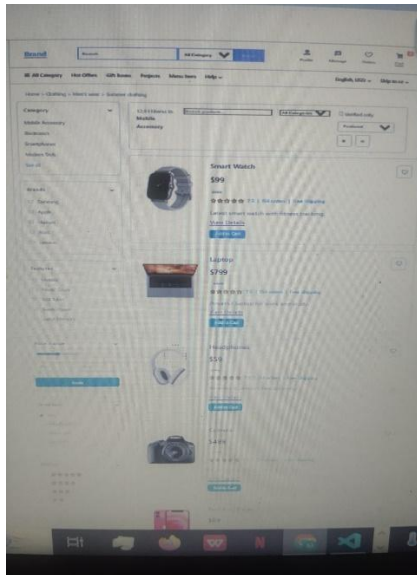

I successfully completed Week 3 tasks as part of my Frontend Web Development Internship.

✦ Project: E-Commerce Frontend Application

Week 3 Implementations:

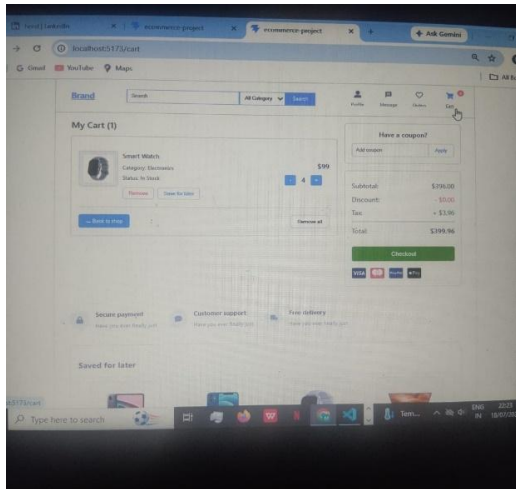

🛒 1. Add to Cart Functionality

- Added Add to Cart feature on Product Listing and Product Details pages
- Implemented cart state updates when products are added
- Prevented duplicate products by increasing quantity automatically

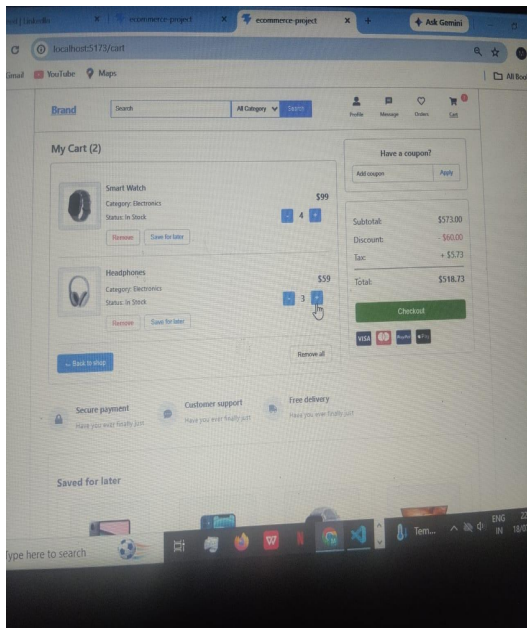

🛒 2. Cart Page Development

- Displayed cart items with product image, name, price, and quantity
- Added quantity increase (+) and decrease (-) controls
- Implemented remove item functionality
- Added dynamic total price calculation
- Designed empty cart user interface

✿ 3. State Management

- Managed global cart state using React Context API
- Connected cart data across different pages
- Added cart item count badge in Navbar

📁 4. Data Persistence

- Integrated localStorage to save cart data
- Restored cart information after page refresh

📱 5. UI Improvements

- Improved component-based structure
- Enhanced responsive design for better user experience
- Updated styling across different sections

✂ Technologies Used:

React.js | JavaScript | CSS | Context API | LocalStorage | Git & GitHub

This week improved my understanding of React state management, reusable components, and building real-world frontend applications.
